

and Electrical Signature Analysis (ESA) of your electric motors, transformers, and generators.

Using innovative technology from ALL-Test Pro, we can take measurements from Motor Control Centers (MCCs), isolators, contactors, and Variable Frequency Drives (VFDs).

Electric motor testing is integral to the success and efficiency of your business.

ALL-TEST Pro's electric motor testing equipment provides comprehensive motor health analyses that go beyond standard testing methods to ensure that your motors stay dependable.

## **Key Diagnostic** Measurements:

Winding Resistance **Impedance** Capacitance Inductance

Dissipation Factor **Phase Angle Current Frequency Response** Insulation Resistance

www.yellotec.co.za +27 (0) 11 656 9111 sales@yellotec.com

## **Detected Failure Modes:**

Turn-to-Turn **Faults** 

Coil-to-Coil **Faults** 

Phase-to-Phase **Faults** 

Insulation **Failures** 

Open **Phases** 

Contaminated

Poor Connections **Broken or Cracked Rotor Bars** 

**Rotor Casting** Voids

Rotor **Eccentricity**  Grounded Windings

Cable **Faults** 

Contact Yellotec today for advanced motor testing solutions to keep your equipment reliable and profitable.

## Service Recommendations:

Regular Motor Circuit Analysis (MCA) and Electrical Signature Analysis (ESA) are recommended for:

- Critical motors in use
- Spare motors in storage
- Motors that frequently stop/start
- Motors in harsh environments
- Motors with known issues

## More from Yellotec:

Unplanned downtime can be extremely costly, with potential losses reaching up to US\$22,000 per minute. Yellotec offers advanced Electrical Motor Analysis solutions to mitigate the risk of motor electrical failures and ensure operational efficiency.

Our advanced predictive maintenance tools for both De-Energized (MCA) and Energized (ESA) testing go beyond traditional condition monitoring methods by providing detailed analysis and trending of the current and pending conditions of electrical windings in motors. transformers, and generators. This enhanced focus on trending allows for more accurate predictive and proactive maintenance, helping to prevent unexpected failures and optimize performance.

Advanced Electric Motor **Testing Instruments** 

De-Energized (MCA™) Testing

**Energized (ESA) Testing** 

**Electrical Motor Diagnostic Level 1 Training Course** 

Yellotec stands proud in the belief of its founder that all failures are preventable.

We are a solution oriented Health and Reliability through the application of advanced technologies.
