OIL ANALYSIS III

Expertise to design a holistic analysis program

Designed as a more in-depth look into this specialized field, Oil Analysis III (OA III) gives you the tools and education to develop, implement and sustain a first-rate, comprehensive oil analysis program. Merging the machine lubrication and oil analysis focuses of course prerequisites, OA III trains you to diagnose problems like contamination, corrosion and additive depletion – even with limited test results or difficult machines.

Through this course, you will compare detection and cost benefits/drawbacks for any type of lab test to select the most precise option for your needs. You will be able to gather extensive data on a lubrication program, make informed decisions and maintain the program as a major company asset. You will also gain strategies for applying your data and analysis to build strong proposals for improvement projects and calculate accurate return on investment predictions.

By completing OA III, you will attain the highest level of expertise and join the elite ranks of others who create or assess new oil analysis programs within any industrial workplace.

Get Certified

Oil Analysis III prepares students for ICML's MLA III certification.

Apply for the certification at icmlonline.com. For questions, call (918)-259-2950.

Training Options

- In-Person
- On-Demand
- On-Site
- Live Online

Course Topics

- Understanding and Analyzing Machine Wear
- Integrating Oil Analysis with Vibration Analysis
- Fluid Properties Analysis
- Additive Depletion
- Contamination Analysis
- Grease Analysis
- Onsite Oil Analysis Options
- Designing an Oil Analysis Program
- Cost/Benefit Analysis
